Abstract of WO0162809

The invention relates to a cosmetic agent which contains at least one water-soluble or water-dispersible polymer containing the following built-in components: a) 5 to 50 wt. % of at least one alpha , beta -ethylenically unsaturated monomer of general formula (I), wherein R<1> represents hydrogen or C1- to C8-alkyl and X<1> represents O or NR<2>, R<2> representing hydrogen, C1- to C8-alkyl or C5- to C8-cycloalkyl, b) 25 to 90 wt. % of at least one N-vinyl amide and/or N-vinyl lactame, c) 0.5 to 30 wt. % of at least one compound with a radically polymerisable, alpha , beta -ethylenically unsaturated double bond and at least one cationogenic and/or cationic group per molecule, d) 0 to 30 wt. % of at least one alpha , beta -ethylenically unsaturated monomer of general formula (II), whererin R<3> represents hydrogen or C1- to C8-alkyl, X<2> represents O or NR<5>, R<5> representing hydrogen, C1- to C8-alkyl or C5- to C8-cycloalkyl, and R<4> represents hydrogen or a linear C1- to C22-alkyl radical; and to salts thereof.
